

DermaPure®

Soft Tissue Regeneration Redefined

The Blueprint for Advanced
Tissue Integration

DermaPure®

DermaPure® offers a breakthrough in treating soft tissue defects. This decellularized dermal allograft integrates seamlessly with the patient's own tissues, serving as a scaffold for natural regeneration.

Key Features and Benefits

DermaPure® provides an exceptional solution for orthopaedic applications and beyond.

Key features include:

Two-year shelf life

Ambient temperature storage (2-30°C)

High sterility assurance level (SAL) of 10^{-6}

Versatile Applications

Within orthopaedics its applications include supplemental support for tendon/ ligament repairs including:

- Achilles
- Retinaculum
- Peroneal
- Rotator Cuff
- Posterior Tibialis

Product Options

Product Code	Description
020300HD-TL	DermaPure® 2 cm x 3 cm
030400HD-TL	DermaPure® 3 cm x 4 cm
040600HD-TL	DermaPure® 4 cm x 6 cm
071000HD-TL	DermaPure® 7 cm x 10 cm
071000HDMESH-TL	DermaPure® Meshed (3:1) 7 cm x 10 cm
