

Revolutionize the Treatment of Keratoconus with (KeraNatural®)

Keratoconus poses unique challenges to patients and surgeons. KeraNatural® offers a natural solution through its allograft rings and arcs made of sterilized human donor cornea. They create exceptional corneal contouring, addressing and correcting the thinning and bulging characteristics of keratoconus, improving patients' vision. KeraNatural® is adjustable to the specifications of each cornea, offering tailored treatment to your patients.

Trust the expertise of VisionGift, an FDA-registered and Eye Bank Association of America accredited eye bank. Their commitment to excellence ensures that KeraNatural® is meticulously processed in their ISO certified clean rooms, guaranteeing consistent and high-quality grafts for optimal outcomes.

KeraNatural® boasts a remarkable sterility assurance level of 10^{-6} achieved through advanced electron beam irradiation process. Its biocompatibility significantly reduces the risk of extrusion compared to synthetic alternatives. Plus, KeraNatural® eliminates the need for deep implantation in the cornea, providing a safer and more natural solution for patients with thin corneas.

Using VisionGift's patented sterilization process, KeraNatural® offers unrivaled ease of use. With a convenient two-year shelf life, it is readily available, eliminating any concerns about timely procurement of fresh corneal tissue.

Shape	Thickness	Size	Product Code
