

# Introducing halo®: The Latest in Sterile Allografts

Cutting-edge innovation for glaucoma and corneal surgery developed by VisionGift

## UNMATCHED PERFORMANCE AND SAFETY

halo® sterile tissues have revolutionized the field of ophthalmology, garnering acclaim for their unrivaled performance. An impeccable track record of zero reported adverse reactions since their introduction in the US in 2014, demonstrates their safety and reliability.

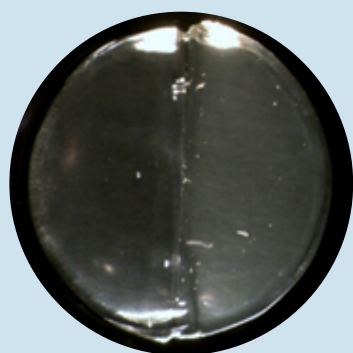

## EFFICIENCY AND TIME-SAVING

At the forefront of efficiency, halo® can reduce surgical time by an impressive 30+ minutes. This game-changing advancement optimizes procedures, delivering enhanced patient care and increased productivity.

## VERSATILITY

Acting as a glaucoma shunt cover, epithelialization substrate, tectonic support, or superficial patch graft, these tissues are the ultimate solution for a wide range of ocular conditions. Their adaptability ensures seamless integration into your surgical repertoire, providing superior outcomes for patients.

halo graft on left, fresh tissue on right.

## QUALITY ASSURANCE

With a sterility assurance level of  $10^{-6}$  using E-beam Sterilization, halo® offers unmatched peace of mind for both emergency and scheduled procedures.

## CONVENIENCE

Enjoy the convenience of a two-year shelf life and storage at room temperature (2-38°C), as well as the assurance that no rinsing or rehydration is required, thanks to its patented easy-peel packaging.

Tissue Type	Shape	Whole/Half	Thickness	Size	Product Code
Cornea		Half	Half	8.5x4mm	HCO-HH1
Cornea		Full	Half	8.5mm	HCO-FH2
Cornea with Scleral Rim		Full	Full	N/A	HCO-WH4
Cornea		Full	Full	8.5mm	HCO-FF3
Sclera		N/A	N/A	10x10mm	HSK-NA2
Pericardium		N/A	N/A	10x10mm	HPE-NA1
